

NG911 SERVICES, INC. ACHIEVES AWS PUBLIC SECTOR PARTNER RECOGNITION

Bellevue, Wa. – June 30, 2021 – NG911 Services, Inc., an innovator of location-based 911 routing solutions, today announced the company has been accepted by Amazon Web Services (AWS) into its Public Sector Partner program. NG911 Services will leverage its AWS Public Sector Partner status to provide state and local 911 governing agencies with fast, highly secure, access to its cloud-based solutions that advance call routing accuracy and increase call center efficiency.

NG911 Services Co-founder and CEO Don Mitchell stated: “Our company mission is to save lives with location-based 9-1-1 services that direct emergency calls to the right agency the first time. The resources and assistance that AWS provide to the government technology industry are incredibly helpful in building today's solutions, as well as those focused on the future. We are excited to achieve AWS Public Sector Partner status and join the growing community of startup companies that are helping to revolutionize the 9-1-1 industry.”

The AWS Public Sector Partner Program recognizes companies with innovative solutions that can build, integrate, and accelerate AWS offerings to government. The collaboration with AWS builds upon NG911 Services' relationship as an AWS ISV (Independent Software Vendor) where the company successfully completed the AWS Foundational Technical Review against a specific set of stringent requirements based on the Security, Reliability, and Operational Excellence pillars of the AWS Well-Architected Framework.

NG911 Services Inc. delivers digital transformation and patented innovation to 911 governing agencies through revolutionary call routing data solutions. We create software that improves wireless 911 call routing and increases the operational efficiencies of your PSAP. Our secure, cloud-based solutions streamline your data governance processes by integrating a data visualization portal, cell coverage data workflows, and routing optimizer tools to empower your public safety agency with vital information and analytics - saving time, money, reputations, and lives.
